Uses of chemical and mechanical restraints have varied throughout the year, although the use in the current year is much lower than years past. More important than how frequent they are is whether they are used according to policy and for appropriate reasons.

With lower numbers of admission for technical parole violators, the numbers of parole revocation hearings held monthly has greatly decreased compared to previous years.

The decrease in DJJ populations is a direct effect of both decreasing court admissions, decreasing admissions for technical violations, and decreases in length of stay during the fiscal year. Additionally, rates and numbers of discharges from Aftercare have increased as well, which has helped those numbers stay lower as well, which provides fewer youth to be readmitted into facilities. Looking at the types of admissions to DJJ, a greater percent of youth are initial commitments than in previous years.
