

Summary of State Fiscal Year 2011 Admissions, Exits and End of the Year Population within
Illinois Department of Juvenile Justice Facilities

Prepared for the
Illinois Department of Juvenile Justice Advisory Board

Prepared by
David E. Olson, Ph.D.
Loyola University Chicago &
Illinois Department of Juvenile Justice Advisory Board Member

&

Connor Concannon
Illinois Department of Juvenile Justice

December 2010

Information Source

The tables on the following pages summarize the characteristics of youth within Illinois Department of Juvenile Justice (DJJ) facilities during state fiscal year (SFY) 2011—covering the period from July 1, 2010 through June 30, 2011. The aggregate data presented in the following tables were generated by staff from the Illinois Department of Juvenile Justice (IDJJ) using data files provided to them by the Illinois Department of Corrections (IDOC). IDJJ staff worked with Dr. Olson at Loyola University Chicago to put together the following tables. The data used to produce the attached tables were generated from DJJ’s Juvenile Tracking System (JTS), a computer system maintained by IDOC as part of the shared services agreement with DJJ.

For the most part, the data entered into JTS and extracted for statistical analyses come from court documents submitted upon a youth’s commitment to DJJ, and some self-reported information obtained from the youth during the Reception and Classification (R&C) process. Much more detailed information is included in the hard-copy social history report completed by county probation departments, which is required for any youth committed to DJJ, but the format and degree of detail of these social history reports varies considerably from county to county, and not all of the information is automated in JTS. In addition, a variety of other information systems are used to track programming, services and behaviors of youth in DJJ, however, the data are not included in the following tables.

Admissions, Exits & End of the Year Population

The data included in the attached tables are intended to provide a general overview of the characteristics of youth within DJJ’s Youth Centers, and does not include the roughly 2,000 youth who are on parole from an Illinois Youth Center (IYC) and supervised in the community. Data are presented separately that describe youth characteristics from three distinct perspectives/points in time: 1) admissions to DJJ facilities during SFY 2011 (Table 1), 2) exits from DJJ facilities during SFY 2011 (Table 2), and 3) the population housed within DJJ facilities at the end of SFY 2010 (i.e., on June 30, 2011) (Table 3). In addition, information is presented regarding the characteristics of all youth (Total) within these three different categories, as well as separately for youth committed from the court (Court Admissions) and those classified as parole violators (Parole Violators). The information is presented separately for admissions, exits and end-of-the-year populations to better illustrate and understand the dynamics between admissions, exits and the population of IYC’s at any particular point in time, and how this influences overall numbers and percentages.

Definitions

Although many of the characteristics presented in the tables are self-explanatory, a few require further definition and clarification.

Crime Type

Included in the tables are a number of different variables that describe the type of crime youth were adjudicated or convicted of, including the “Holding Crime Class,” the “Holding Offense,” the “Holding Offense Type,” the “Holding Offense Type 2,” and “Holding Offense Type 3.” These variables describe the crime youth were adjudicated/convicted of, and in cases where there were multiple offenses a youth was adjudicated/convicted for, the crime carries the longest sentence (i.e.,

will “hold” the youth the longest in a DJJ facility). The “Holding Crime Class” describes the level of the felony or misdemeanor offense associated with the crime youth were adjudicated/convicted of in court. The most serious felony in Illinois is First Degree Murder, followed by Class X felonies, and Class 1 to 4 felonies. The “Holding Offense” and the other holding offense variables are simply different ways to group or aggregate the crimes for which youth were adjudicated/convicted. The offenses for youth classified as parole violators are the offenses which originally resulted in their admission to DJJ, not the offense associated with their return to DJJ. Finally, youth who violate a *probation sentence* and are subsequently committed to a DJJ facility often have the original crime that resulted in their probation sentence as the holding offense, not necessarily any new arrests or violations that may have caused the revocation of probation.

Committing County

This variable indicates the jurisdiction in Illinois (there are a total of 102 counties in the state) where the youth was adjudicated/convicted. In some instances the committing county may not be the county where the youth lived, and may not be the county where youth exiting DJJ facilities reside upon their release.

Current Admission Type

This variable describes the reason for the youth’s admission into DJJ. The first five—Court Evaluation, Court Evaluation Return, Discharged and Recommitted, Initial Commitment, and Parole Violators with a New Sentence—are all admissions that result for a court-order or sentence. Court evaluations are youth committed to DJJ for an evaluation to determine their need for DJJ services, and the youth are then returned to the court with that evaluation. If a judge determines that youth they committed for a court evaluation should be returned to DJJ to receive the recommended services, they are returned to DJJ to serve the remainder of their sentence and then counted as a Court Evaluation Return. Discharged and recommitted are youth who had previously been committed to DJJ, completed their sentence and period of parole, but were later rearrested, readjudicated/convicted, and recommitted to DJJ. Initial Commitment youth are those that are committed by the court and have never before been committed to a DJJ facility. Finally, Parole Violators with a New Sentence are youth who were committed to a DJJ facility, released on parole and during their period of parole supervision were rerrested, reconvicted and recommitted to DJJ. Because most youth released from DJJ facilities are close to the age of majority (17 years of age), and therefore, if rearrested and reconvicted would most likely be in the adult court, very few youth are admitted to DJJ as Discharged and Recommitted youth, or Parole Violators with a New Sentence. The last two types of admissions—Technical MSR Violator and Technical Parole Violator—are youth released from DJJ facilities but returned due to a violation of either their Mandatory Supervised Release (MSR, which is used for youth who were convicted in the adult court and released from a DJJ facility) or a violation of their Parole (used to supervise youth adjudicated in the juvenile court and released from a DJJ facility). Technical violations of MSR or parole can include a wide range of violations, from arrest for a new crime to failure to report to their parole officer to positive drug tests, along with many other reasons. The supervision of youth on parole and MSR is carried out by staff from the Illinois Department of Corrections under the shared services agreement.
