According to the *RJ Consent Decree*, DJJ is required to have general education student to teacher ratios of 10 youth to 1 teacher and special education student to teacher ratios of 6 youth to 1 teacher. As of the end of December, DJJ had an average of 3.1 general education youth for each general education teacher and 7.1 special education youth for each special education teacher. Therefore, the agency meets the consent decree requirements for general education overall, but not special education. At the facility level, Harrisburg and Warrenville meet the special education ratio requirement.

Uses of chemical and mechanical restraints have varied throughout the year, although the use in the current year is much lower than years past. Numbers and rates of uses of restraints should be related to population size and number and types of incidents. More important than how frequent they are is whether they are used according to policy and for appropriate reasons.

With lower numbers of admission for technical parole violators, the numbers of parole revocation hearings held monthly has greatly decreased compared to previous years.

The decrease in DJJ populations is a direct effect of both decreasing court admissions, decreasing admissions for technical violations, and decreases in length of stay during the fiscal year. Additionally, rates and numbers of discharges from Aftercare have increased as well, which has helped those numbers stay lower as well, which provides fewer youth to be readmitted into facilities. Looking at the types of admissions to DJJ, a greater percent of youth are initial commitments than in previous years.

According to the *RJ Consent Decree*, DJJ is required to have general education student to teacher ratios of 10 youth to 1 teacher and special education student to teacher ratios of 6 youth to 1 teacher. As of the end of November, DJJ had an average of 3.3 general education youth for each general education teacher and 7.5 special education youth for each special education teacher. Therefore, the agency meets the consent decree requirements for general education overall, but not special education.

Uses of chemical and mechanical restraints have varied throughout the year, although the use in the current year is much lower than years past. Numbers and rates of uses of restraints should be related to population size and number and types of incidents. More important than how frequent they are is whether they are used according to policy and for appropriate reasons.

With lower numbers of admission for technical parole violators, the numbers of parole revocation hearings held monthly has greatly decreased compared to previous years.

The decrease in DJJ populations is a direct effect of both decreasing court admissions, decreasing admissions for technical violations, and decreases in length of stay during the fiscal year. Additionally, rates and numbers of discharges from Aftercare have increased as well, which has helped those numbers stay lower as well, which provides fewer youth to be readmitted into facilities. Looking at the types of admissions to DJJ, a greater percent of youth are initial commitments than in previous years.

According to the *RJ Consent Decree*, DJJ is required to have general education student to teacher ratios of 10 youth to 1 teacher and special education student to teacher ratios of 6 youth to 1 teacher. As of the end of October, DJJ had an average of 3.1 general education youth for each general education teacher and 8 special education youth for each special education teacher. Therefore, the agency meets the consent decree requirements for general education overall, but not special education. Additionally, at the facility level, only Pere Marquette meets the standard.

Uses of chemical and mechanical restraints have varied throughout the year, although the use in the current year is much lower than years past. Numbers and rates of uses of restraints should be related to population size and number and types of incidents. More important than how frequent they are is whether they are used according to policy and for appropriate reasons.

The decrease in DJJ populations is a direct effect of both decreasing court admissions, decreasing admissions for technical violations, and decreases in length of stay during the fiscal year. Additionally, rates and numbers of discharges from Aftercare have increased as well, which has helped those numbers stay lower as well, which provides fewer youth to be readmitted into facilities. Looking at the types of admissions to DJJ, a greater percent of youth are initial commitments than in previous years.

Monthly Report:

September 2019

JB Pritzker

Governor

Heidi Mueller

Director

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

A mild attempt is defined as when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is defined as when a youth attempts self-harm, appears to be motivated by suicidal intent, and inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and inflicts harm to self that requires medical attention or whose attempt it believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), is a commonly used tool in psychology to provide standard criteria and descriptions of mental disorders. It contains a variety of disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorder. Nationally, research estimates that between 40 and 60 percent of incarcerated juveniles have a diagnosable mental disorder. These estimates typically exclude substance and conduct disorders.

Each IDJJ facility maintains an in-house substance abuse treatment program. The facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youths enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance, the number reported tends to be higher than the actual number enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department earn some sort of diploma during their stay. Nationally, it is estimated that 40% of youth held in juvenile facilities have a need for special education services. School district data collected on the final day of the month.

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults occur when one or more youths strike another youth or youths. Youth fights occur when two or more youth mutually engage in a fight. Youth on staff assaults occur when one or more youth commit physical violence against one or more staff members.

Uses of mechanical restraints refer to the temporary application of handcuffs with force. The numbers provided are the total number of instances per facility per month. If multiple youth are placed in mechanical restraints at the same time it is counted as two instances. After any use, youth are checked by medical professionals.

Table 15: Uses of Confinement for September

	Number of Uses	Rate of Usage per 100 Youth	Average Length of Hold in Minutes
<i>Behavioral Holds</i>	196	49.0	74.8

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” and create subtypes based on the reason for use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data are presented as the number of behavioral holds, the rate of use per 100 youth in each facility, and the average length of confinement in minutes. A behavioral hold is a status assigned to a youth who is confined to their own room or a designated area when they are engaged in dangerous behavior that poses a serious and immediate threat to their safety, the safety of others, or the security of the youth center.

Monthly Report:

August 2019

JB Pritzker

Governor

Heidi Mueller

Director

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department earn some sort of diploma during their stay. Nationally, it is estimated that 40% of youth held in juvenile facilities have a need for special education services. School district data collected on the final day of the month.

Uses of mechanical restraints refer to the temporary application of handcuffs with force. The numbers provided are the total number of instances per facility per month. If multiple youth are placed in mechanical restraints at the same time it is counted as two instances. After any use, youth are checked by medical professionals.

Table 15: Uses of Confinement for August

	Number of Uses	Rate of Usage	Average Length of Hold
<i>Behavioral Holds</i>	162	50.4	77.2

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” and create subtypes based on the reason for use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data is presented as the number of behavioral holds, the rate of use per 100 youth in each facility, and the average length of confinement in minutes. A behavioral hold is a status assigned to a youth who is confined to their own room or a designated area when they are engaged in dangerous behavior that poses a serious and immediate threat to their safety, the safety of others, or the security of the youth center.

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

A mild attempt is defined as when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is defined as when a youth attempts self-harm, appears to be motivated by suicidal intent, and inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and inflicts harm to self that requires medical attention or whose attempt it believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), is a commonly used tool in psychology to provide standard criteria and descriptions of mental disorders. It contains a variety of disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorder. Nationally, research estimates that between 40 and 60 percent of incarcerated juveniles have a diagnosable mental disorder. These estimates typically exclude substance and conduct disorders.

Each IDJJ facility maintains an in-house substance abuse treatment program. The facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youths enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance, the number reported tends to be higher than the actual number enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment.

A mild attempt is defined as when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is defined as when a youth attempts self-harm, appears to be motivated by suicidal intent, and inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and inflicts harm to self that requires medical attention or whose attempt it believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), is a commonly used tool in psychology to provide standard criteria and descriptions of mental disorders. It contains a variety of disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorder. Nationally, research estimates that between 40 and 60 percent of incarcerated juveniles have a diagnosable mental disorder. These estimates typically exclude substance and conduct disorders.

Each IDJJ facility maintains an in-house substance abuse treatment program. The facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youths enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance, the number reported tends to be higher than the actual number enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department earn some sort of diploma during their stay. Nationally, it is estimated that 40% of youth held in juvenile facilities have a need for special education services. School district data collected on the final day of the month.

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults occur when one or more youths strike another youth or youths. Youth fights occur when two or more youth mutually engage in a fight. Youth on staff assaults occur when one or more youth commit physical violence against one or more staff members.

Uses of mechanical restraints refer to the temporary application of handcuffs with force. The numbers provided are the total number of instances per facility per month. If multiple youth are placed in mechanical restraints at the same time it is counted as two instances. After any use, youth are checked by medical professionals.

Table 15: Uses of Confinement for June

	Number of Uses	Rate of Usage	Average Length of Hold
<i>Behavioral Holds</i>	150	53.3	93.6

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” and create subtypes based on the reason for use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data is presented as the number of behavioral holds, the rate of use per 100 youth in each facility, and the average length of confinement in minutes. A behavioral hold is a status assigned to a youth who is confined to their own room or a designated area when they are engaged in dangerous behavior that poses a serious and immediate threat to their safety, the safety of others, or the security of the youth center.

Monthly Report:

May 2019

JB Pritzker

Governor

Heidi Mueller

Director

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

Each IDJJ facility maintains an in-house substance abuse treatment program. The facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youths enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance, the number reported tends to be higher than the actual number enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department earn some sort of diploma during their stay. Nationally, it is estimated that 40% of youth held in juvenile facilities have a need for special education services. School district data collected on the final day of the month.

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults occur when one or more youths strike another youth or youths. Youth fights occur when two or more youth mutually engage in a fight. Youth on staff assaults occur when one or more youth commit physical violence against one or more staff members.

Uses of mechanical restraints refer to the temporary application of handcuffs with force. The numbers provided are the total number of instances per facility per month. If multiple youth are placed in mechanical restraints at the same time it is counted as two instances. After any use, youth are checked by medical professionals.

Table 15: Uses of Confinement for May

	Number of Uses	Rate of Usage per 100 Youth	Average Length of Hold in Minutes
<i>Behavioral Holds</i>	130	44.0	93.6

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” and create subtypes based on the reason for use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data are presented as the number of behavioral holds, the rate of use per 100 youth in each facility, and the average length of confinement in minutes. A behavioral hold is a status assigned to a youth who is confined to their own room or a designated area when they are engaged in dangerous behavior that poses a serious and immediate threat to their safety, the safety of others, or the security of the youth center.

Monthly Report

April 2019

JB Pritzker
Governor

Heidi Mueller
Director

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation.

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

The headcount of security staff is obtained by examining the number of security staff on active payroll for each facility. As facilities must be staffed 24 hours a day, 7 days a week, it takes 3 or 4 staff to fill one post, full time. The number of security staff includes security supervisors and interns.

* FY refers to the calendar year.

Self-harm rates are measured by the total number of incidents and do not reflect the number of youth who have attempted self-harm. A mild attempt is when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is when a youth attempts self-harm and appears to be motivated by suicidal intent and as such inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and as such inflicts harm to self that requires medical attention or whose attempt is believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition, is a commonly used tool in the psychology field to provide standard criteria and descriptions of mental disorders. It contains a variety of mental disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorders. Nearly all youth in IDJJ facilities have a minimum of one diagnosis according to DSM-5 definitions. Nationally, research estimates that between 40 and 60% of incarcerated juveniles have a diagnosable mental disorder. These estimates tend to exclude substance abuse and conduct disorders.

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults are when one or more youth strikes another youth or youths. Youth fights are when two or more youth mutually engage in a fight. Youth on staff assaults are when one or more youth commit physical violence against one or more staff members.

Uses of mechanical restraints are the temporary application of handcuffs as a use of force. The numbers provided are the total number of uses at each facility per month. If there is an incident where two youth are placed in mechanical restraints at the same time, that is counted as two uses. After any use, youth are checked by a medical professional.

Table 15: Uses of Confinement for April 2019

	Number of Uses	Average Rate of Usage	Average Length of Hold
<i>Behavioral Holds</i>	170	63.5	85

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” broadly and created subtypes based on the reason for its use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data is being presented on the number of uses of behavioral holds, the rate of use per 100 youth in facility, and the average length of a confinement hold in minutes. The numbers represent uses of confinement and not youths confined. A behavioral hold is when a status assigned to a youth who is confined to their own room or designated area because he or she is engaging in dangerous behavior that poses a serious and immediate threat to his or her own safety, the safety of others, or the security of the youth center.

<i>Average Number of Youth in Facilities</i>	7.5	7.1	6.7	6.6	6.5	5.5	6	6.3	6.1	5.5

There are three groups of youth served by Aftercare. Youth in facilities are currently held in an IDJJ facility, but preparing for their transition to the community. Youth in the community are currently supervised through Aftercare after release from a facility. Youth suspended or with warrants are in violation of the terms of their supervised release and are supervised in the community or being held in a facility pending a legal hearing or have a warrant issued for their arrest. The average number of youth on caseload provides the average number of all types of youth that one Aftercare Specialist will supervise.

Table 18: Aftercare Specialist Contact per Youth by Office in April 2019

<i>Springfield</i>	72	1.8	64	1.9
<i>Placement</i>	569	2.9	216	4.1
IDJJ Total	1571	2.4	1159	2.6

Contacts between Aftercare and a youth start to occur prior to their release from an IDJJ facility. Contacts, both overall and in the community, are face-to-face meetings that occur between Aftercare Specialists and youth, their host site, placement staff, and engaged friends and family members. Contacts per youth provides an average number of contacts an Aftercare specialist will have for each youth on their caseload. Contacts per youth in community only examines contacts regarding youth that are actively monitored in the community. Per Departmental policy, Aftercare Specialists are meant to have one to four meetings per month with each youth, depending on their level of supervision.

Monthly Report

March 2019

JB Pritzker
Governor

Heidi Mueller
Director

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation.

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

IDJJ Total	519	517	506	502	531	522	512	506	

The headcount of security staff is obtained by examining the number of security staff on active payroll for each facility. As facilities must be staffed 24 hours a day, 7 days a week, it takes 3 or 4 staff to fill one post, full time. The number of security staff includes security supervisors and interns.

* FY refers to the calendar year.

Table 3: Percent of Youth on Psychotropic Medication

<i>April</i>	44.6%	
<i>May</i>	42.7%	
<i>June</i>	40.5%	
IDJJ Average	45.9%	48.6%

Nationally, the rates of incarcerated youth on psychotropic medication tend to range between 20 and 40%. Additionally, greater numbers of incarcerated females utilize psychotropic medications than males and have higher rates of diagnosis for mental disorders.

Table 4: FY 2019 Rate of Self-Harm Attempts by Severity per 100 Youth

	Mild Self-Harm Attempts	Moderately Severe Self-Harm Attempts	Severe Self-Harm Attempts	Total Attempts or Threats
<i>July</i>	1.97	0.28	0.00	2.25

<i>March</i>	2.78	0.35	0.00	3.13
IDJJ Average	1.26	0.32	0.00	1.58

Self-harm rates are measured by the total number of incidents and do not reflect the number of youth who have attempted self-harm. A mild attempt is when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is when a youth attempts self-harm and appears to be motivated by suicidal intent and as such inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and as such inflicts harm to self that requires medical attention or whose attempt is believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition, is a commonly used tool in the psychology field to provide standard criteria and descriptions of mental disorders. It contains a variety of mental disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorders. Nearly all youth in IDJJ facilities have a minimum of one diagnosis according to DSM-5 definitions. Nationally, research estimates that between 40 and 60% of incarcerated juveniles have a diagnosable mental disorder. These estimates tend to exclude substance abuse and conduct disorders.

Each of the IDJJ facilities have an in-house substance abuse treatment program. Treatment at the facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youth enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance into the programs, the number of youth reported in a program tends to be greater than the actual number of youth enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment. Many youth enrolled in treatment are polysubstance users and are treated accordingly.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department receive some sort of diploma during their stay. Nationally, it is estimated that about 40% of youth held in juvenile facilities have a need for special education services. School district data is collected on the final day of the month.

There are three groups of youth served by Aftercare. Youth in facilities are currently held in an IDJJ facility, but preparing for their transition to the community. Youth in the community are currently supervised through Aftercare after release from a facility. Youth suspended or with warrants are in violation of the terms of their supervised release and are supervised in the community or being held in a facility pending a legal hearing or have a warrant issued for their arrest. The average number of youth on caseload provides the average number of all types of youth that one Aftercare Specialist will supervise.

Contacts between Aftercare and a youth start to occur prior to their release from an IDJJ facility. Contacts, both overall and in the community, are face-to-face meetings that occur between Aftercare Specialists and youth, their host site, placement staff, and engaged friends and family members. Contacts per youth provides an average number of contacts an Aftercare specialists will have for each youth on their caseload. Contacts per youth in community only examines contacts regarding youth that are actively monitored in the community. Per Departmental policy, Aftercare Specialists are meant to have one to four meetings per month with each youth, depending on their level of supervision.

The Illinois Department of Juvenile Justice has two goals:

- Make Illinois communities safer for all residents.
- Foster better life outcomes for youth in the Department's custody by providing appropriate and effective rehabilitation.

In March 2015, the Department unveiled its comprehensive strategic plan focusing on five core principles:

- Right-Size: Reduce the use of secure custody for low-risk youth
- Rehabilitate: Improve programs to meet the needs of high-risk youth
- Reintegrate: Improve programs to ensure successful reentry
- Respect: Create a safe and respectful environment for youth and staff
- Report: Increase transparency and accountability

This monthly report is part of the Department's commitment to enhance reporting and transparency. This allows the Department to more effectively inform stakeholders and the public about operations and outcomes.

The headcount of security staff is obtained by examining the number of security staff on active payroll for each facility. As facilities must be staffed 24 hours a day, 7 days a week, it takes 3 or 4 staff to fill one post, full time. The number of security staff includes security supervisors and interns.

* FY refers to the calendar year.

<i>April</i>	44.6%	
<i>May</i>	42.7%	
<i>June</i>	40.5%	
IDJJ Average	45.9%	48.9%

Nationally, the rates of incarcerated youth on psychotropic medication tend to range between 20 and 40%. Additionally, greater numbers of incarcerated females utilize psychotropic medications than males and have higher rates of diagnosis for mental disorders.

Table 4: FY 2019 Rate of Self-Harm Attempts by Severity per 100 Youth

	Mild Self-Harm Attempts	Moderately Severe Self-Harm Attempts	Severe Self-Harm Attempts	Total Attempts or Threats
<i>July</i>	1.97	0.28	0.00	2.25

<i>February</i>	0.00	0.00	0.00	0.00
IDJJ Average	1.07	0.32	0.00	2.00

Self-harm rates are measured by the total number of incidents and do not reflect the number of youth who have attempted self-harm. A mild attempt is when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is when a youth attempts self-harm and appears to be motivated by suicidal intent and as such inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and as such inflicts harm to self that requires medical attention or whose attempt is believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition, is a commonly used tool in the psychology field to provide standard criteria and descriptions of mental disorders. It contains a variety of mental disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorders. Nearly all youth in IDJJ facilities have a minimum of one diagnosis according to DSM-5 definitions. Nationally, research estimates that between 40 and 60% of incarcerated juveniles have a diagnosable mental disorder. These estimates tend to exclude substance abuse and conduct disorders.

Each of the IDJJ facilities have an in-house substance abuse treatment program. Treatment at the facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youth enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance into the programs, the number of youth reported in a program tends to be greater than the actual number of youth enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment. Many youth enrolled in treatment are polysubstance users and are treated accordingly.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department receive some sort of diploma during their stay. Nationally, it is estimated that about 40% of youth held in juvenile facilities have a need for special education services. School district data is collected on the final day of the month.

Table 12: FY 2019 Rate of Reportable Incidents per 100 Youth

Overall Reportable Incidents	38.0	34.4	31.6	32.0	35.1	40.7	43.6	25.9

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults are when one or more youth strikes another youth or youths. Youth fights are when two or more youth mutually engage in a fight. Youth on staff assaults are when one or more youth commit physical violence against one or more staff members.

Uses of mechanical restraints are the temporary application of handcuffs as a use of force. The numbers provided are the total number of uses at each facility per month. If there is an incident where two youth are placed in mechanical restraints at the same time, that is counted as two uses. After any use, youth are checked by a medical professional.

Table 15: Uses of Confinement for February 2019

	Number of Uses	Rate of Usage	Average Length of Hold
<i>Behavioral Holds</i>	109	0.4	174

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” broadly and created subtypes based on the reason for its use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data is being presented on the number of uses of behavioral holds, the rate of use per 100 youth in facility, and the average length of a confinement hold in minutes. The numbers represent uses of confinement and not youths confined. A behavioral hold is when a status assigned to a youth who is confined to their own room or designated area because he or she is engaging in dangerous behavior that poses a serious and immediate threat to his or her own safety, the safety of others, or the security of the youth center.

Nationally, the rates of incarcerated youth on psychotropic medication tend to range between 20 and 40%. Additionally, greater numbers of incarcerated females utilize psychotropic medications than males and have higher rates of diagnosis for mental disorders.

Table 4: FY 2019 Rate of Self-Harm Attempts by Severity per 100 Youth

	Mild Self-Harm Attempts	Moderately Severe Self-Harm Attempts	Severe Self-Harm Attempts	Total Attempts or Threats
<i>July</i>	1.97	0.28	0.00	2.25
<i>August</i>	0.93	0.93	0.00	1.86

<i>January</i>	0.37	0.00	0.00	0.37
IDJJ Average	1.23	0.36	0.00	2.00

Self-harm rates are measured by the total number of incidents and do not reflect the number of youth who have attempted self-harm. A mild attempt is when a youth verbalizes, threatens, or gestures self-injurious behavior. A moderately severe attempt is when a youth attempts self-harm and appears to be motivated by suicidal intent and as such inflicts superficial harm to self that may require minor medical attention. A serious attempt is when a youth self-harms and as such inflicts harm to self that requires medical attention or whose attempt is believed to be potentially lethal and is scheduled for medical observation.

The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition, is a commonly used tool in the psychology field to provide standard criteria and descriptions of mental disorders. It contains a variety of mental disorders including depression and bipolar disorder and also includes diagnoses of conduct disorder and substance abuse disorders. Nearly all youth in IDJJ facilities have a minimum of one diagnosis according to DSM-5 definitions. Nationally, research estimates that between 40 and 60% of incarcerated juveniles have a diagnosable mental disorder. These estimates tend to exclude substance abuse and conduct disorders.

Each of the IDJJ facilities have an in-house substance abuse treatment program. Treatment at the facilities utilize education and group therapy to help decrease future substance use. The number of treatment participants is the total number of youth enrolled in a substance abuse program during the month of interest. Due to treatment failure, drop out, and rolling acceptance into the programs, the number of youth reported in a program tends to be greater than the actual number of youth enrolled at one time. Primary substance abused is the primary drug of choice for a youth in treatment. Many youth enrolled in treatment are polysubstance users and are treated accordingly.

School District 428 offers three types of diplomas for students: 8th grade, high school, and general equivalency. The District offers blended learning, utilizing both online and in-person instruction. An estimated 10% of youth admitted to the Department receive some sort of diploma during their stay. Nationally, it is estimated that about 40% of youth held in juvenile facilities have a need for special education services. School district data is collected on the final day of the month.

Table 12: FY 2019 Rate of Reportable Incidents per 100 Youth

Overall Reportable Incidents	38.0	34.4	31.6	32.0	35.1	40.7	43.6

Reportable incidents measure incidents of disruption in a correctional facility. The numbers provided are rates per 100 youth in IDJJ custody. Youth on youth assaults are when one or more youth strikes another youth or youths. Youth fights are when two or more youth mutually engage in a fight. Youth on staff assaults are when one or more youth commit physical violence against one or more staff members.

<i>IYC Warrenville</i>	0	0	0	0	0	0	0
IDJJ Total	28	11	5	4	2	8	6

Uses of chemical restraints are instances of the use of pepper spray as a use of force. The table provides a total number of uses at each facility per month. After any use, youth are checked by a medical professional and have an opportunity to shower.

Table 14: FY 2019 Uses of Mechanical Restraints

<i>IYC Warrenville</i>	12	4	5	2	3	13	6
IDJJ Total	90	60	62	57	40	69	61

Uses of mechanical restraints are the temporary application of handcuffs as a use of force. The numbers provided are the total number of uses at each facility per month. If there is an incident where two youth are placed in mechanical restraints at the same time, that is counted as two uses. After any use, youth are checked by a medical professional.

Table 15: Uses of Confinement for January 2019

	Number of Uses	Rate of Usage	Average Length of Hold
<i>Behavioral Holds</i>	131	0.5	154

Effective January 2019, IDJJ began utilizing new policies and procedures regarding the use of confinement and removal of youth from regular programming and housing. These policies and procedures redefine “confinement” broadly and created subtypes based on the reason for its use. The Department also developed new ways of measuring the use of confinement. To aid public understanding of confinement use, data is being presented on the number of uses of behavioral holds, the rate of use per 100 youth in facility, and the average length of a confinement hold in minutes. The numbers represent uses of confinement and not youths confined. A behavioral hold is when a status assigned to a youth who is confined to their own room or designated area because he or she is engaging in dangerous behavior that poses a serious and immediate threat to his or her own safety, the safety of others, or the security of the youth center.

<i>Average Number of Youth in Facilities</i>	7.5	7.1	6.7	6.6	6.5	5.5	6

There are three groups of youth served by Aftercare. Youth in facilities are currently held in an IDJJ facility, but preparing for their transition to the community. Youth in the community are currently supervised through Aftercare after release from a facility. Youth suspended or with warrants are in violation of the terms of their supervised release and are supervised in the community or being held in a facility pending a legal hearing or have a warrant issued for their arrest. The average number of youth on caseload provides the average number of all types of youth that one Aftercare Specialist will supervise.

IDJJ Total	1606	2.3	1195	2.7

Contacts between Aftercare and a youth start to occur prior to their release from an IDJJ facility. Contacts, both overall and in the community, are face-to-face meetings that occur between Aftercare Specialists and youth, their host site, placement staff, and engaged friends and family members. Contacts per youth provides an average number of contacts an Aftercare specialist will have for each youth on their caseload. Contacts per youth in community only examines contacts regarding youth that are actively monitored in the community. Per Departmental policy, Aftercare Specialists are meant to have one to four meetings per month with each youth, depending on their level of supervision.
